29 August 1978

MEMORANDUM FOR: Director of Central Intelligence

THROUGH : Acting Director, National Foreign Assessment Center  
Deputy Director of Central Intelligence *so*

FROM : Associate Coordinator for Academic Relations and  
External Analytical Support, NFAC

SUBJECT : Meeting with University Presidents

1. Action Requested: Signature on the letters to fourteen university presidents inviting them to the Agency for a day of discussions and briefings sometime in October.

2. Background: The letter is similar to those you sent to the university presidents inviting them to the previous two meetings of this kind. The following are recommended for addition to our list of invitees:

Josiah Bunting	Hampden-Sydney College
Arthur Gene Hansen	Purdue University
<del>Willard Lee Boyd</del>	<del>University of Iowa</del>
Richard Michael Cyert	Carnegie-Mellon University
Philip Guthrie Hoffman	University of Houston
Robert Crocker Good	Denison University
William Edward Lavery	Virginia Polytechnic Institute
H. Edwin Young	University of Wisconsin
Ronald William Roskens	University of Nebraska
George Michael Low	Rensselaer Polytechnic Institute
Jean Mayer	Tufts University
<del>Theodore Wood Friend, III</del>	<del>Swarthmore College</del>
William R. Harvey	Hampton Institute
James Edward Cheek	Howard University

(See attachment for bio sketches)

SUBJECT: Meeting with University Presidents

STATINTL

STATINTL  
3. Of the fourteen, the first twelve were recommended by [REDACTED]  
[REDACTED]  
to an invitation from the DCI for a visit to CIA. The last two names  
were recommended by the [REDACTED] as leading educators from  
predominantly black universities.

STATINTL

4. In addition, we shall invite Wes Posvar and the other presidents  
who were unable to accept your previous invitations, but who said they  
might accept at another time. They are:

Norman Hackerman	Rice University
Robert Sproull	University of Rochester
David Saxon	University of California, Berkeley
Terry Sanford	Duke University
John Sawhill	New York University
Thomas A. Bartlett	Association of American Universities

The renewed invitations will be handled informally; new letters from you  
do not seem to be necessary.

5. Although the invitation list will consist of twenty-one names, we  
expect six or seven at most to be able to accept on any given date. This  
will be roughly twice the number we have had on earlier visits. Reflecting  
the view of some senior staff members, Mr. Bowie especially, that the time  
and effort expended here will be better justified if the group of visitors  
is larger. The schedule and sequence of meetings for this visit should be  
substantially the same as the successful meeting of 14 June. Once a date  
is settled on, this office will coordinate the remaining arrangements.

6. Actions Recommended:

a. That you sign the letters to the fourteen university  
presidents.

b. That you indicate your concurrence with the arrange-  
ments proposed for handling the third university presidents  
visit.

Dear President Bunting:

Since its inception, the Central Intelligence Agency has sought to maintain effective relationships with scholars and academic institutions throughout the United States. These relationships have been of inestimable value to the intelligence community and ultimately, to the foreign policymakers it serves.

In the wake of considerable public criticism over the last several years, however, the Agency has had difficulty in maintaining these open and mutually beneficial relationships. I would like to ask your help and advice in determining how best to restore a useful but proper connection between academia and the world of intelligence.

Clearly there are limits beyond which we in the intelligence profession should not go in dealing with members of the academic community. I do have very express rules with respect to that today, but how we are operating within these rules is not always clear to others. Today there are also many new opportunities to use unclassified information derived through the collection of intelligence for the benefit of academic research. I do not believe that we have the proper mechanism today to ensure the adequate provisions of such information to academic institutions.

Accordingly, I would like to ask you to join with me and several other university presidents and leaders of the American academic community for a day here at the Central Intelligence Agency. The objective would be to have a free-flowing exchange of ideas on how to reestablish the academic-intelligence relationship on a sound and proper basis for mutual advantage. This will be a quiet, private meeting of perhaps six of us, during which we will take the opportunity of asking you to visit our CIA facilities and to meet with a variety of Agency officers representing diverse interests and disciplines. My hope would be that in your spending a day with us, our relationship might improve to our mutual benefit, taking into full account the problems of the past and the attitudes of the present.

STATINTL

I have asked [REDACTED] of my Academic Relations staff to be in touch with you directly to arrange a date in October that will be convenient. They will be available to discuss my invitation further with you, and to make arrangements, if as I hope, you will be able to accept.

Yours sincerely,

STANSFIELD TURNER
